<p>Rio, A. and Cerrone, M. CONSIDERATIONS ON THE CHARACTERISTICS OF MASTIC ASPHALT. [1960] [24p]. Order from SLA m\$2.70, ph\$4.80 61-10166  Trans. from Giornale del Genio Civile (Italy) 1957, no. 6.</p> <p>Results are presented of tests on samples of mastics prepared with bitumens having the same natural origin but a different penetration, and with mineral aggregates of a different type and different granulometry. The characteristics examined on the different mastics were: the cohesiveness, the fragility point at low temperature, the elastic return, the degree of deformation under constant load and the apparent viscosity of the mastics at 160° C. The results show the favorable influence that the long maturation (ripening) undergone through time by natural asphalt has on the technical properties when compared to the reconstituted one. To obtain a mastic with good behavior under working (Materials, TT, v. 5, no. 5) (over)</p>	<p>61-10166 1. Asphalt--Mechanical properties 2. Title: Mastics I. Rio, A. II. Röper, H. AUTOMATIC GAGING OF WALL THICKNESS FOR GLASS CONTAINERS (Ein Beitrag zur Automatischen Wandstärkenmessung bei Glas). [1962] [5p]. (Foreign text included). Order from SLA \$1.10	62-14876  I. Röper, E.
Trans. of Glas-Email-Keramo-Technik (West Germany) 1957, v. 8, no. 10, p. 390-391.	62-14876
DESCRIPTORS: *Glass, *Containers, Thickness, Measurement, *Gages, Automatic.	
A gauge for measuring the thickness of glass walls is described made in its present design thus, that, with- out mechanical adjustment being necessary, the thick- ness of any (transparent) glass sheet is indicated automatically. The manner of measuring is also well adapted for fully automatically measuring and thereby assorting hollow glass articles. (Author) (Materials--Ceramics, TT, v. 8, no. 6)
